# NFP Performance Measures WA Home Visiting Services Account

DCYF - Early Learning/Family Support

Original Date: May 22, 2020
Family Support | Approved for distribution by Rene Toolson, Home Visiting Contract Team Lead

www.dcyf.wa.gov

executive officer of the applicable party.

## Agenda

- 1. NFP Outcome: Healthy Birthweight Progress
  - Progress
  - Risk Adjustment
  - Discussion
- 2. FY20 Services and Quality Milestones and Performance Data
  - Enrollment
  - Family Retention
  - Depression Screens and Referrals
- 3. FY21 PBC Contract Updates

## What Do We Need From You?

- Open participation in this webinar
- Thoughts and reflections on the data, processes, findings based on your experience, and wisdom in program implementation
- Engaging and thinking deeply
- Direct input

## Reflect and Explore: Healthy Birthweight

- Review Data and Analysis
- Explore Risk Adjustment
- Discussion of 3 key questions:
  - What meaning can you make from the healthy birthweight data?
  - What shifts do you see in the prevalence of risk characteristics from last year to this? And how might that contribute to birthweight outcomes?
  - What about the prevalence of risk characteristics from this year to next year, particularly in light of Covid-19?

## Healthy Birthweight

#### Individual Award: – Infants born weighing between 2500 and 4500 grams

Number of participants who give birth to infant of healthy birthweight during the year (\$60 for each participant who gives birth to an infant of healthy birthweight; \$40 bonus if participant possesses at least one identified HBW characteristic below)

#### Cohort Award: NFP Cohort reaches/exceeds risk-adjusted target of 91% HBW

Number of all NFP participants who give birth to an infant of healthy birthweight during the year as a percent of all births to NFP participants and as a risk-adjusted percent of the LIA's total births during the year

(\$750 to each LIA if the LIA measure is equal to or greater than 85% and the entire cohort measure is equal to or greater than 91%)

#### Identified HBW Characteristics of Mother:

Black/African American American Indian or Alaskan Native
Used alcohol while pregnant Smoked While Pregnant

35 years or older at enrollment Homeless

Used drugs while pregnant (marijuana, cocaine, other)

## **Data Collection Shift**

 Data collection time frame was shifted by one month earlier to allow time for LIAs to enter birth information into the data system

For SFY20, all infants born between 6/1/2019 and 5/31/2020 will be eligible for payment. LIAs will have until the end of June to enter all information about births.

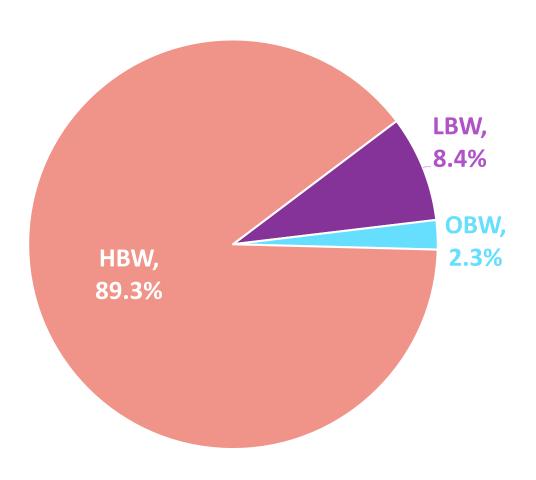

## Healthy Birth Weight: NFP SFY20, Q1-3

#### **Births (June 2019 - March 2020)**

- Total = 351 births
- Range (11, 69)

#### **Birthweight\***

- HBW (2500-4499g) = 309 (89.3%)
- LBW (<2500g) = 29 ( 8.4%)
- OBW (4500+g) = 8(2.3%)
- HBW with 1+ Chars = 134 (38.7%)

<sup>\* 5</sup> births missing birthweight data are not included

## **BW Analysis**: Identification of Characteristics associated with Low/High Infant Birthweight

- Analyses used 5 years of data (SFY 2016 SFY 2020)
  - All SFYs shifted a month to the left: 6/1 to 5/31 (N=1781)
- Included unborn children with Due Date in SFY 2020
  - 314 born children in SFY 2020 so far (June Feb/Mar)
  - 119 unborn children with due dates in SFY 2020
  - A total of 433 children for SFY 2020

## Births over the years

Note. SFY and Quarters are shifted one month to the left for all BW analyses.

State Fiscal Year (shifted one month)	Freq.	
SFY 2016 (born)	299	
SFY 2017 (born)	383	
SFY 2018 (born)	416	
SFY 2019 (born)	471	
SFY 2020 (born)	314 լ	A total of 433
SFY 2020 (unborn)*	119	babies expected

<sup>\*</sup>SFY20 unborn children are those with no Child DOB and have Due Dates in SFY2020.

## Distribution of Characteristics

### 5 Years (N=1781)

Characteristics	Freq.	Percent
Black or African American	229	12.9%
American Indian or Alaska Native	98	5.5%
Age 35+	52	2.9%
Smoked (past 48hrs)	436	24.5%
Used alcohol (past 14 days)	35	2.0%
Used drug (past 14 days)	170	9.6%
Homeless	46	2.6%

<b>Number of Characteristics</b>	Freq.	Percent
0	963	54.1%
1	609	34.2%
2	174	9.8%
3-4	35	2.0%
Total	1,781	100%

## Distribution of Characteristics

5 Years (N=1781)

Characteristics	Freq.	Percent	
Black or African American	229	12.9%	•
American Indian or Alaska Native	98	5.5%	
Age 35+	52	2.9%	•
Smoked (past 48hrs)	436	24.5%	
Used alcohol (past 14 days)	35	2.0%	
Used drug (past 14 days)	170	9.6%	
Homeless	46	2.6%	

Significant association with LBW or OBW

<b>Number of Characteristics</b>	Freq.	Percent
0	963	54.1%
1	609	34.2%
2	174	9.8%
3-4	35	2.0%
Total	1,781	100%

Borderline significance association with LBW or OBW

## Distribution of Characteristics

5 Years (N=1781)

Characteristics	Freq.	Percent
Black or African American	229	12.9%
American Indian or Alaska Native	98	5.5%
Age 35+	52	2.9%
Smoked (past 48hrs)	436	24.5%
Used alcohol (past 14 days)	35	2.0%
Used drug (past 14 days)	170	9.6%
Homeless	46	2.6%

Characteristics	
Black or African American	
American Indian or Alaska Native	
Age 35+	
Smoked (past 48hrs)	
Used alcohol (past 14 days)	
Used drug (past 14 days)	
Homeless	

<b>Number of Characteristics</b>	Freq.	Percent

## Healthy Birthweight Outcome

5 Years (N=1781)

<u>Birthweight</u>	Freq.	<b>Percent</b>
LBW (<2500g)	187	10.5
Healthy BW (2500-<4500g)	1,572	88.27
High BW (4500g-)	22	1.24
Total	1,781	100

Low Birthweight will drive the outcome greater rather than high birthweight.

#### SFY20 (N=346)

<u>Birthweight</u>	Freq.	<b>Percent</b>
LBW (<2500g)	29	8%
Healthy BW (2500-<4500g)	309	89%
High BW (4500g-)	<10	<5%
Total	346	100

## Healthy Birthweight – Key Questions

- What meaning can you make from the healthy birthweight data?
- What shifts do you see in the prevalence of risk characteristics from last year to this? And how might that contribute to birthweight outcomes?
- What about the prevalence of risk characteristics from this year to next year, particularly in light of Covid-19?

Developed with support from Third Sector Capital Partners

## Reflection on FY20 Milestones

- Enrollment
- Family Retention
- Depression Screening and Referrals

## **Enrollment** (Service Milestone)

## Meet/exceed quarterly enrollment of 90% (of funded caseload)

Average of the number of families actively enrolled on the last day\* of Month 1, Month 2 and Month 3 of the quarter Maximum Service Capacity (funded caseload)

• Award based on size of contract budget (~.125% of budget across all funding sources)

Note: Actively enrolled means participant received at least 1 visit in last3 months\* (or encounter after April 1)

### **Enrollment: NFP**

#### **HVSA Enrollment:**

- Q1 = 76%
- Q2 = 78%
- Q3 = 76%\*
- Goal = 90%

#### **NFP Enrollment:**

- Q1 = 84%
- Q2 = 82%
- Q3 = 79%
- Goal = 90%

#### **HVSA Slots:**

SFY18 = 2,138

SFY19 = 2,213

SFY20 = 2,326\*\*

#### **NFP Slots:**

SFY18 = 936

SFY19 = 951

SFY20 = 1,024\*\*\*

- \*Excludes UIAT and Portfolio Programs
- \*\*Excludes Lummi, Brigid Collins, Atlantic Street, and Dec'19 expansion. \*\*\*Excludes Dec'19 expansion for SRHD, Thurston, YVMH

## Family Retention (Quality Milestone)

#### Individual award: Participants remain engaged for 12 months after enrollment

Number of enrolled participants who have not exited and receive a visit\* between 30 days before/after the 12-month anniversary of enrollment during the contract year (\$40 for each participant; \$20 bonus for each participant with 2 or more characteristics below)

#### Individual award: Participants remain engaged for 18 months after enrollment

Number of enrolled participants who have not exited and receive a visit\* between 30 days before/after the 12-month anniversary of enrollment during the contract year (\$20 for each participant; \$10 bonus for each participant with 2 or more characteristics below)

#### Demographic Characteristics Related to Early Exit:

Teenage (parent <20 years old) Homelessness

Participating on TANF Education: Less than high school completion (among non-teen parents)

## Family Engagement: NFP – SFY20, Q1-3

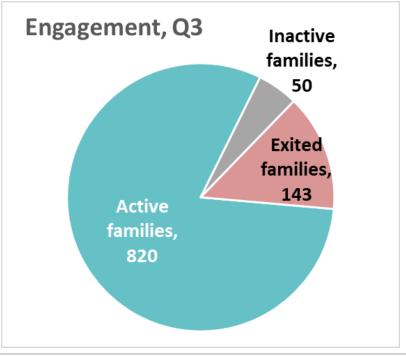

### Retention

Number of families that reached retention timeframe Jul 2019 - Mar 2020

## Engagement

Avg length of Service among Exits <24 mos = 9.7 months

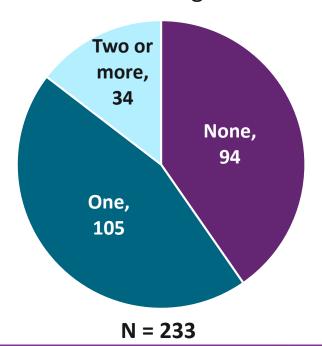

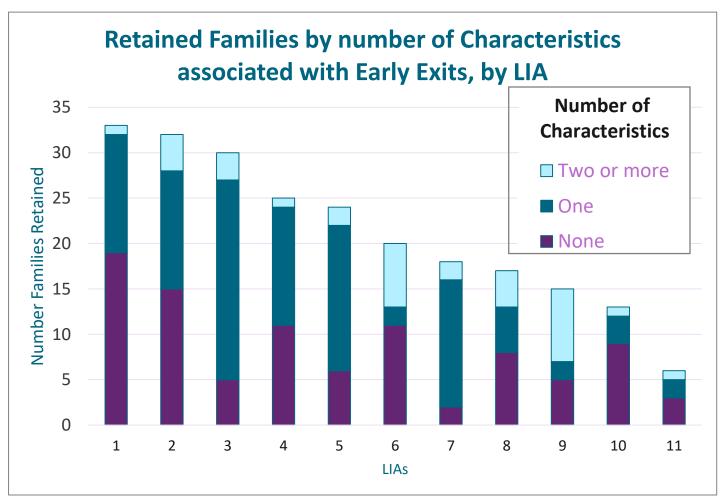

## 12 Month Retention: NFP - SFY20 Q1-3

Distribution of Characteristics associated with Early Exits among the 233 families who met the 12 Month Retention goal

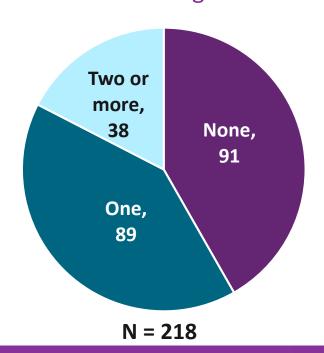

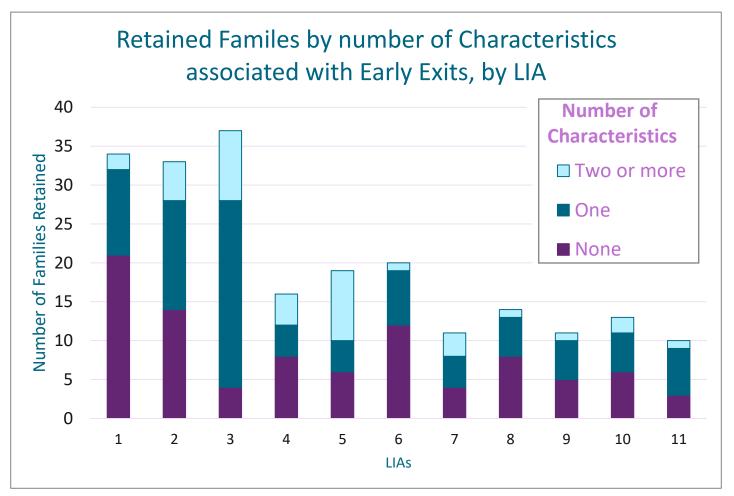

## 18 Month Retention: NFP - SFY20 Q1-3

Distribution of Characteristics associated with Early Exits among the 218 families who met the 18 Month Retention goal

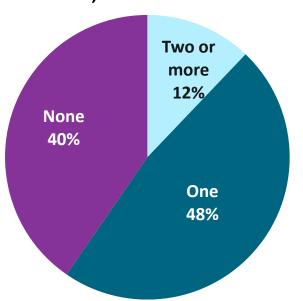

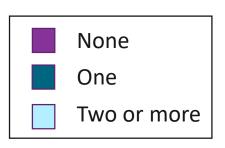

## Family Retention: Additional Characteristics for consideration – 12 month example

#### **Retention Factors Included:**

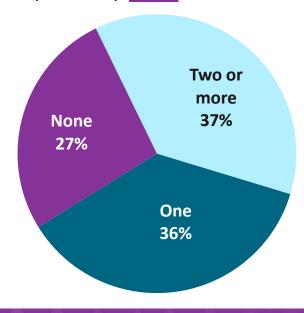

Teen parent, Less than HS education, Homeless, TANF

#### **Retention Factors Included:**

Teen parent, Less than HS education, Homeless, TANF, <u>and</u> no live-in partner

## Depression Screening and Referral (Quality Milestone)

## Individual award: Participating caregivers receive depression screen within 3 months of enrollment/delivery

Number of depression screenings performed during the year in the time frame (\$30 for each screening, capped at # payments for 100% of funded caseload)

#### Individual award: Follow-Up a positive screen with referral/connection to services

Number of participants who screened positive and were referred or connected to services during the contract year

(\$50 for each screening, capped at # payments for 100% of funded caseload)

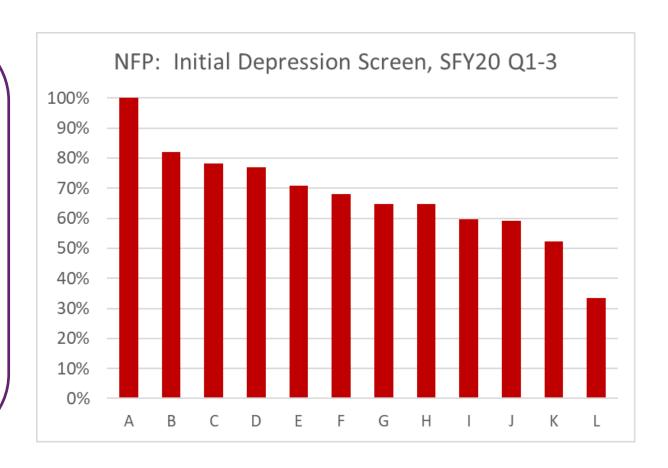

## Depression Screens & Referrals: NFP

Milestone 1: Completion of a depression screening for an enrolled primary caregiver within 3 months postpartum (if enrolled prenatal) or 3 months after enrollment (if enrolled post-natal).

- ➤ Initial Screen all Models
- ➤ Results Q1-Q3 = 230 completed screens

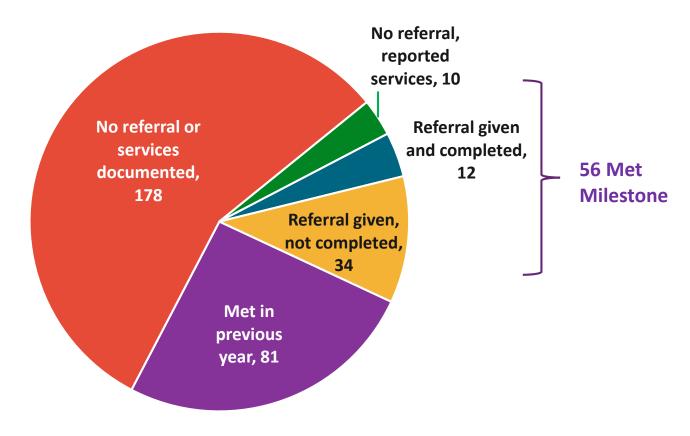

## Depression Screens & Referrals

Milestone 3: Follow-Up with a referral to or connection with appropriate services for an enrolled primary caregiver who screened positive for depression.

➤ NFP Results Q1-Q3 = 56
Referrals Given,
Completed and/or
Receiving Services

N = 315 Positive Screens, SFY19-20

## **FY21 Performance Milestones**

FY21 awards \$ will likely change based on available funding and expected performance.

- Enrollment 90% no change
- Family Retention 12 and 18 months; addition of relationship status to the demographic characteristics related to early exit
- Depression Screening and Referrals PHQ-9 within 3 months; referral of those screening positive no change
- Healthy Birthweight individual and cohort award; threshold waiting for FY20 performance
