C3 Race and Ethnicity Data Points

The total number of children for each racial category collected within the Data Management System (DMS) are represented above.

- Total number of children for C3 data across SS1 & SS2 = 7249
- Data for Outcome (A-B-C) were disaggregated via race and ethnicity by % of population served
- Data for Outcome (A-B-C) were compared to WA State wide and variance calculated

Indicator 3: Early Childhood Outcomes

Reports the percentage of infants and toddlers with IFSPs who demonstrate improved outcomes during their time in Part C.

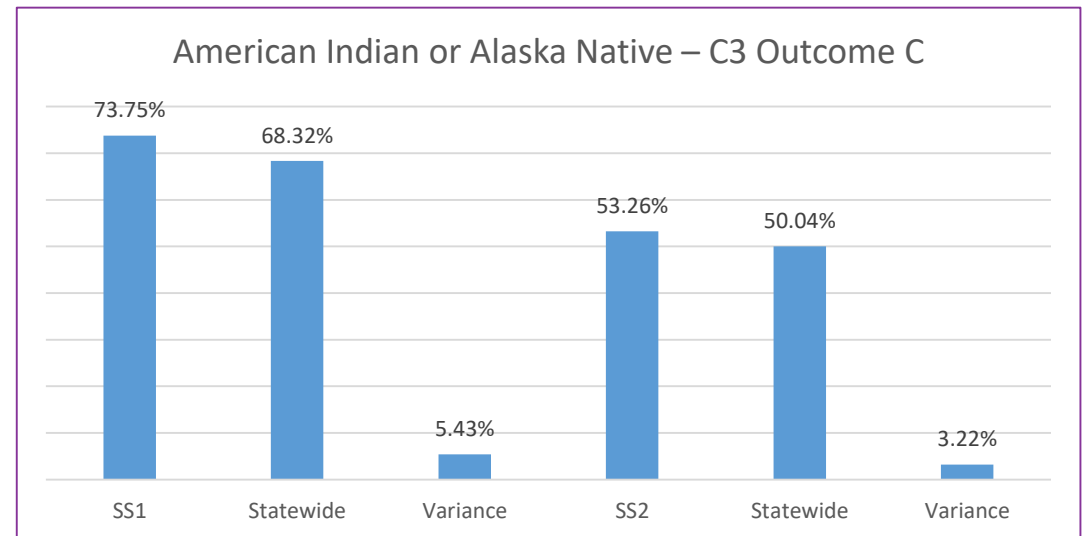

- A. Positive social-emotional skills (including social relationships);
- B. Acquisition and use of knowledge and skills (including early language/communication); and
- C. Use of appropriate behaviors to meet their needs.

For this indicator, states report data on two summary statements for each of the three outcome areas. The summary statements are calculated based on the number of children in each of five progress categories. The child outcomes summary statements are:

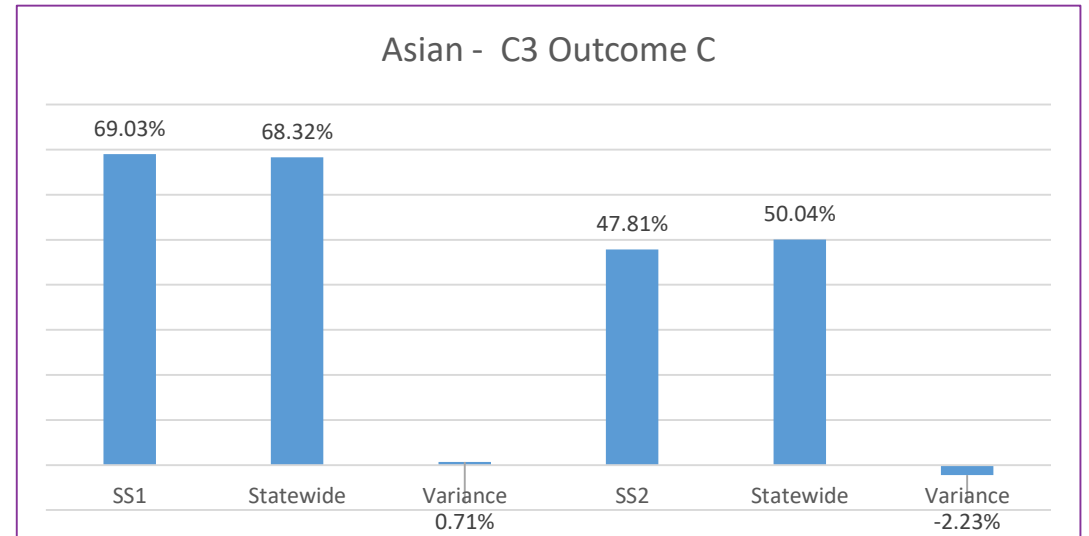

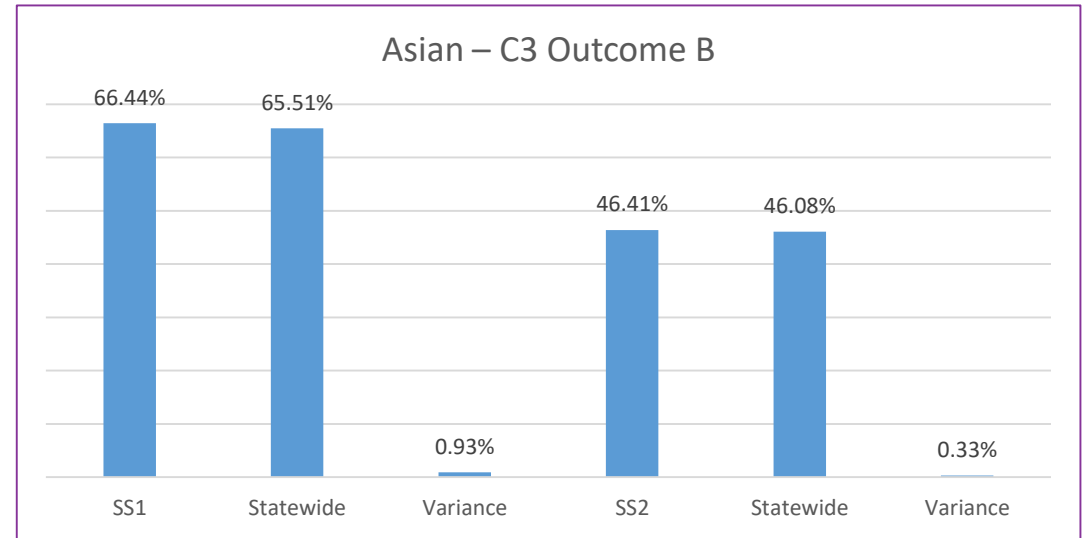

- **Summary Statement 1:** Of those children who entered the program below age expectations in each outcome, the percent who substantially increased their rate of growth by the time they turned three years of age or exited the program.
- **Summary Statement 2:** The percent of children who were functioning within age expectations in each outcome by the time they turned three years of age or exited the program.
